1. McKethan, A., et al. [What Public Employee Health Plans Can Do to Improve Health Care Quality: Examples From the States](#). New York, NY: The Commonwealth Fund, 2008. (CS-315)
Public employee health plans provided benefits for 13 million people in 2008.
2. Covertheuninsuredweek.org. [Health Care Costs Exceeded \\$2 Trillion in 2006](#). Robert Wood Johnson Foundation, January 14, 2008. (CS-313)
47 million people were uninsured in 2006, reported the Los Angeles Times.

2007

3. [Health Insurance Costs](#). National Coalition on Health Care, 2007. Accessed November 25, 2007 (CS-309)
Nearly 47 million Americans were uninsured in 2007.
4. Obama, B. [Barack Obama's Plan for a Healthy America](#). Barack Obama, Accessed November 11, 2007 (CS-301)
Nearly 45 million Americans—including 9 million children—lacked health insurance in 2007.
5. [Documentation, Codebook, and Frequencies: Health Insurance](#). National Health and Nutrition Examination Survey, November 2007. (CS-312)
In 2005/2006, NHANES asked 10,348 people if they were covered by health insurance or some kind of health care plan. 18.5% answered no. 6.9% answered that there was a time they had no insurance within the past year. 49% were covered by private insurance, 11.5% by Medicare, 15.9% by Medicaid, 1% by SCHIP, 2% by military health care, <1% by Indian Health Services, 3.3% covered by other government insurance, 2.5% covered by a single service plan
6. [Early Release of Selected Estimates Based on Data From the 2007 National Health Interview Survey](#). Washington, DC: National Center for Health Statistics, September 26, 2007. (CS-307)
The Family Core component of the 2007 NHIS collected data from January through March based on household interviews of a sample of the civilian noninstitutionalized population. In 2007, the percentage uninsured at the time of interview was 14.2%. 41.9 million people did not have health insurance in 2007 (6.3 million under 18 years old). In 2007, 66.5% of people under age 65 were covered by private health insurance plans.
7. Meckler, L. "Why Clinton Embraced Employer-Based Insurance." [Wall Street Journal](#), September 19, 2007. (CS-296)
60% of employers offered health insurance in 2007, according to a Kaiser/HRET survey.
8. Woolhandler, S. "Health Reform Failure." [Boston Globe](#), September 17, 2007. (CS-293)
According to the Census Bureau's latest figures, 47 million people were uninsured in 2006 - up 2.2 million since 2005.
9. [U.S. Census Reports 2.2 Million More Uninsured](#). Robert Wood Johnson Foundation/Cover the Uninsured Week, 2007. Last Updated September 5, 2007 (CS-306)
Statistics released by the U.S. Census Bureau showed that the number of Americans without health insurance in 2006 was 47 million, an increase of 2.2 million over the previous year, reported USA Today.
10. [Health Insurance Coverage: 2006 - Highlights](#). U.S. Census Bureau, Page Last Modified: August 28, 2007 (CS-308)

The percentage without health insurance increased from 15.3% in 2005 to 15.8% in 2006 and the number of uninsured increased from 44.8 million to 47.0 million. In 2006, 201.7 million people were covered by private health insurance. The percentage of people covered by employment-based health insurance decreased to 59.7% in 2006, from 60.2% in 2005. The percentage and the number of people covered by Medicaid were statistically unchanged at 12.9% and 38.3 million in 2006. The percentage and the number of children under 18 years old without health insurance increased to 11.7% and 8.7 million in 2006 (from 10.9% and 8.0 million in 2005)

11. Kotlikoff, L. J. "We are All Uninsured Now." [Boston Globe](#), August 28, 2007. (CS-295)
45 million Americans were uninsured in 2007, according to former Supreme Court justice Sandra Day O'Connor. There were 9 million uninsured children in 2007. 59% of Americans had employer-based health insurance in 2007.
12. Hiebert-White, J. "Insurance: Big Jump In Number Of Uninsured Americans." [Health Affairs](#). August 28, 2007. (CS-292)
The U.S. Census Bureau announced that the number of uninsured Americans rose to 47 million in 2006, up from 44.8 million in 2005. There were 15.8% of Americans without insurance in 2006, up from 15.3% in 2005. In 2006, 11.7% (8.7 million) kids were uninsured—up from 10.9% (8 million) in 2005. The percentage of Americans covered by employment-based health insurance decreased to 59.7% in 2006 (from 60.2% in 2005). Medicaid enrollment remained statistically unchanged. The Census Bureau data are from the Annual Social and Economic Supplement to the Current Population Survey. The Center on Budget and Policy Priorities stated that the number of uninsured children rose from 7.7 million in 2004 to 8.7 million in 2006.
13. Jacoby, M. "Romney's Federal Prescription." [Wall Street Journal](#), August 24, 2007. (CS-290)
Nearly 45 million people lacked health insurance in 2007. No data source was provided.
14. "Romney's Healthcare Amnesia." [Boston Globe](#), August 23, 2007. (CS-291)
43.6 million people now live without coverage. No data source was provided.
15. McQueen, M. P. "Health Insurers Target the Individual Market." [Wall Street Journal](#), August 21, 2007. (CS-294)
Roughly 45 million Americans were uninsured in 2007. No data source was provided.
16. [Medicare Health and Drug Plan Tracker](#). Henry J. Kaiser Family Foundation, 2007. Accessed August 10, 2007 (CS-286)
In 2006, there were 44,067,816 Medicare beneficiaries.
17. [NCHS - FASTSTATS - Health Insurance](#). National Center for Health Statistics, 2007. Last Updated August 3, 2007 (CS-289)
The National Health Interview Survey found that for 2006, there were 43.3 million uninsured persons (16.8%), 66.5% were privately insured, and 9.3% children were uninsured and 59.7% of children were privately insured.
18. Giuliani, R. W. "A Free-Market Cure for US Healthcare System." [Boston Globe](#), August 3, 2007. (CS-303)
More than 45 million Americans were without health insurance in 2007. 175 million Americans had employer-based coverage in 2007.
19. "Creeps and Bounds: Can America Provide Universal Health Care Without Adopting a Government-Run System?" [Economist](#). July 19, 2007. (CS-298)
47 million or so Americans had no health insurance in 2007. No data source was provided.
20. Iglehart, J. K. "Insuring All Children — The New Political Imperative." [New England Journal of Medicine](#). 357 (1): 70-76, July 5, 2007. (CS-316)
In 2005, 68.2% of all workers were covered by private insurance, 59.5% of which was employer-sponsored. 46.6 million people were uninsured in 2005 (15.9%). Data from the U.S. Census showed that in 2005, 11.2% of children had no coverage (8.3 million), 26.7% had Medicaid/SCHIP, 60.5% had employer-sponsored insurance, 5.5% had individually purchased insurance, 0.7% had Medicare, and 3.1% had military health care. In 2004, 10.8% of children had no coverage (7.9 million), 27% had Medicaid/SCHIP, 61% had employer-sponsored insurance, 5.8% had individually purchased insurance, 0.7% had Medicare, and 2.8% had military health care.
21. Toner, R. "Health Care Looms as Top Campaign Issue." [New York Times](#), July 5, 2007. (CS-300)
44.8 million people were uninsured in 2007. No data source was provided.
22. Orszag, P. R. [Health Care and the Budget: Issues and Challenges for Reform](#). Washington, DC: Congressional Budget Office, June 21, 2007. (CS-299)
45 million people were uninsured at any given point in 2005.
23. "Obama's Incomplete Health Plan." [Boston Globe](#), May 30, 2007. (CS-302)
45 million Americans were uninsured in 2007.

24. [America's 8.3 Million Uninsured Kids are "a Stain on the Nation"](#). Robert Wood Johnson Foundation/Covertheuninsuredweek.org, May 14, 2007 (CS-278)
8.3-9 million children were uninsured in 2007. No data source was provided.
25. "Hillary's Healthy Focus." [Boston Globe](#), May 13, 2007. (CS-277)
6 million children were covered by SCHIP and 9 million were uninsured in 2007. No data source was provided.
26. Farzaneh. [Intel Inside: Andy Grove's Solutions for Health Care](#). Blog at WordPress.com, May 3, 2007 (CS-314)
46 or 50 million people were uninsured in 2007, according to Intel co-founder Andy Grove.
27. [2007 Annual Report of the Boards of Trustees of the Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds](#). Washington, DC: The Boards of Trustees of the Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds, April 23, 2007. (CS-267)
In 2006, 43.2 million people were covered by Medicare: 36.3 million aged 65 and older, and 7.0 million disabled.
28. [Medicare: A Primer](#). Menlo Park, CA: Henry J. Kaiser Family Foundation, March 19, 2007. (DC-193)
Medicare provided coverage to nearly 44 million people in 2007, including about 37 million people age 65 and older and 7 million adults with disabilities.
29. [State's SCHIP Enrollment and Spending Experiences and Considerations for Reauthorization](#). Washington, DC: Government Accountability Office, March 1, 2007. (CS-275)
In 2005, SCHIP covered approximately 6 million enrollees, including about 639,000 adults.
30. [Health Care Coverage in America: Understanding the Issues and Proposed Solutions](#). Alliance for Health Reform, March 2007. (CS-288)
Over 46 million people, including 8.3 million children, were uninsured in 2007. In 2005, 8.3 million children were uninsured, up from 8 million in 2004. The percentage of the U.S. population without health coverage was 15.9% in 2005. Some 63.9 million people—more than 25% of the population under age 65—lacked coverage at some point in 2004. On March 23, 2007, the U.S. Census Bureau released a revised figure of 44.8 million uninsured for 2005, based on a more accurate methodology.
31. Burton, A., et al. [State Strategies to Expand Health Insurance Coverage: Trends and Lessons for Policymakers](#). New York, NY: The Commonwealth Fund, January 2007. (CS-280)
47 million people were uninsured in 2005. According to the Kaiser Commission on Medicaid and the Uninsured, 63% of people had employer-based insurance in 2004.
32. Cohn, J. [Sick: The Untold Story of America's Health Care Crisis---and the People Who Pay the Price](#) New York, NY: HarperCollins, 2007. (CS-264)
In 2005, 12% of children in the US were uninsured. At any one time, 16% of Americans (about 46 million people) were uninsured. Among experts, a rough consensus exists that, at any one time, between 40 and 45 million people have no health insurance.
33. [Bipartisan House Bill Proposes Large Expansion of SCHIP](#). Robert Wood Johnson Foundation/Covertheuninsuredweek.org, February 19, 2007 (CS-266)
SCHIP served 5 million children in 2007, according to a bipartisan group of House members.
34. [President Bush Pledges to Cover More of the Nation's Uninsured](#). Robert Wood Johnson Foundation/Covertheuninsuredweek.org., February 19, 2007. (CS-265)
President Bush said that 47 million uninsured Americans were uninsured in 2007.
35. Fletcher, M. "Bush Eyes Tax Break for Health Insurance." [Boston Globe](#), January 21, 2007. (CS-276 HO-189)
150 million people were insured through an employer and 47 million people were uninsured in 2007. No data source was provided.
36. Pear, R. "In '05, Medical Bills Grew at Slowest Pace in 6 Years." [New York Times](#), January 9, 2007. (CS-269)
Medicaid covered more than 50 million people in 2005.
37. Krugman, P. "A Healthy New Year." [New York Times](#), January 1, 2007. (CS-274)
In 2005, almost 47 million Americans, including more than 8 million children, were uninsured. No data source was provided.

38. Relman, A. S. [A Second Opinion: Rescuing America's Health Care](#). New York: New York: The Century Foundation, 2007. (CS-310)
46.6 million people were uninsured at some point in 2005 (15.9%, 1.3 million more than in 2004), according to the Census Bureau. 46-47 million people were uninsured in 2007. 160 million people were covered by an employer in 2007.
39. Brownlee, S. [Overtreated: Why Too Much Medicine is Making Us Sicker and Poorer](#). New York, NY: Bloomsbury, 2007. (CS-311)
47 million Americans were uninsured in 2007. As many as 60 million Americans are uninsured at some point during the course of a year.
40. Kotlikoff, L. J. [The Healthcare Fix: Universal Insurance for All Americans](#). Cambridge, MA: The MIT Press, 2007. (CS-305)
47 million people were uninsured in 2007. >8 million children were uninsured in 2007. According to a Kaiser Family Foundation study, 57% of people had employer sponsored insurance in 2007. >42 million people were enrolled in Medicare and >60 million were covered by Medicaid in 2007.
41. [Quality, Affordable Health Care for All: Moving Beyond the Employer-Based Health-Insurance System](#). Washington, DC: Committee for Economic Development, 2007. (CS-304)
47 million people were uninsured in 2006. 177.2 million people received health insurance through an employer in 2006.

2006

42. Sundquist, D. [Final Report and Recommendations: Medicaid Committee](#). Washington, DC: Medicaid Commission, December 29, 2006. (CS-287)
Medicaid was expected to provide coverage for 53 million individuals in 2007. Medicaid provided coverage for approximately 25 percent of the nation's children in 2006.
43. Armstrong, D. "Wyden Pushes for Universal Health Care Legislation." [CQ HealthBeat](#), December 13, 2006. (CS-271)
According to the Kaiser Family Foundation, 63% of working-age adults had employer-based health insurance in 2004.
44. Gabel, J. R., et al. [Behind the Slow Growth of Employer-Based Consumer-Driven Health Plans](#). Washington, DC: Center for Studying Health System Change, December 2006. (CS-252)
70 million American workers obtained health benefits from their employer in 2006, according to the 2006 Kaiser Family Foundation/Health Research and Educational Trust Employer Health Benefits Survey.
45. [Defense Health Care: Access to Care for Beneficiaries Who Have Not Enrolled in TRICARE's Managed Care Option](#). Washington, DC: Government Accountability Office, December 2006. (CS-257)
In fiscal year 2005, almost 10 million beneficiaries were eligible to receive health care under TRICARE.
46. "AHIP Hop." [Wall Street Journal](#), November 20, 2006. (CS-273)
40-some million Americans are uninsured each year, according to America's Health Insurance Plans.
47. Martinez, B. "In Medicaid, Private HMOs Take a Big, and Profitable Role." [Wall Street Journal](#), November 15, 2006. (CS-181)
Some 55 million people were covered by Medicaid in 2006. No data source was provided.
48. Pear, R. "Health Insurance Industry Urges Expansion of Coverage." [New York Times](#), November 14, 2006. (CS-272)
Government figures showed that 46.6 million Americans were uninsured in 2006. Health Net, a managed care company, estimated that employers covered 175 million people in 2006.
49. [The Employer-Based Health-Insurance System \(EBI\) is at Risk: What We Must Do About It](#). Washington, DC: Committee for Economic Development, November 7, 2006. (CS-279)
According to the Census Bureau, 46.6 million Americans were uninsured in 2006. In 2005, there were 174.2 million people (60%) covered through an employer, according to EBRI.
50. Covertheuninsuredweek.org. [Employer-Based Coverage Declines, Study Shows](#). Robert Wood Johnson Foundation, October 25, 2006 (CS-248)
The Kaiser Family Foundation and the Alliance for Health Reform found that 77.4% of working Americans had employer-sponsored health insurance in 2005.
51. Appleby, J. "Consumer Unease with U.S. Health Care Grows." [USA Today](#), October 16, 2006. (CS-270)

According to Census Bureau data released in August 2006, the percentage of people who received health insurance through their jobs was 59.5%. In 2006, nearly 16% of the population, or 46.6 million, were uninsured, according to Census estimates.

52. [The Uninsured: A Primer](#). Washington, DC: Kaiser Commission on Medicaid and the Uninsured, October 2006. (CS-282)
KCMU/Urban Institute analyzed the March 2006 CPS. 46.1 million Americans (18%) were without health insurance in 2005. In 2005, 61% were covered by employer-sponsored insurance and 5% by private/non group. Medicaid covered 28 million children and SCHIP covered 6 million children in 2005.
53. Clemans-Cope, L., et al. [Changes in Employees' Health Insurance Coverage, 2001-2005](#). Washington, DC: Henry J. Kaiser Family Foundation, October 2006. (CS-241)
In 2005, 77.4% of employees were covered by employer sponsored health insurance. 18.8 million employees (17%) were uninsured in 2005. Data were from the Urban Institute analysis of the February 2005 Contingent Work Supplement of the Current Population Survey (CPS) and the March 2005 Annual Social and Economic (ASEC) Supplement of the CPS.
54. Holahan, J. [Why Did the Number of Uninsured Continue to Increase in 2005?](#) Washington, DC: Henry J. Kaiser Family Foundation, October 2006. (CS-240)
The Census Bureau reported that the number of nonelderly uninsured Americans increased in 2005 by 1.3 million people to 46.1 million uninsured. 300,000 more children were uninsured in 2005 than in 2004. Between 2004 and 2005, employer-sponsored coverage went from 63.3% to 62.9%. The uninsurance rate went from 17.6% to 17.9% between 2004-2005. Among children there was a decline in employer-sponsored insurance from 61.1% to 60.5% and an increase in the uninsurance rate from 11.2% to 11.6% between 2004-2005. Among families with one full-time worker, their uninsurance rate increased from 17.9% to 18.9% between 2004-2005. For families with no workers in the family, 17.3% had employer-sponsored insurance, and 29.4% were uninsured in 2005.
55. Fuhrmanns, V. "Health-Care Premiums Rise 7.7%, Outpacing Wages and Inflation." [Wall Street Journal](#), September 26, 2006. (CS-238)
The Kaiser Family Foundation/HRET survey of 2,122 employers found that 59% of workers received health insurance through an employer in 2006.
56. Freudenheim, M. "Luring Customers from Medicare." [New York Times](#), September 22, 2006. (CS-245)
42.5 million people subscribed to Medicare in 2006.
57. Appleby, J. "Medicare Premiums to Rise 5.6% for Most Seniors." [USA Today](#), September 12, 2006. (CS-247)
There were 43 million Medicare beneficiaries in 2006.
58. Covertheuninsuredweek.org. [An Increase in Uninsured Kids for the First Time Since 1998 May Prompt Debate over SCHIP Renewal](#). Robert Wood Johnson Foundation, September 5, 2006 (CS-249)
The Census found that 11.2% (about 8.3 million) of the nation's children were uninsured in 2005, and 10.8% who lacked coverage in 2004.
59. Glabman, M. "Taking the Pulse of Consumer-Driven Health Plans." [Physician Executive](#). 32 (5): 6, September/October 2006. (CS-259)
46 million Americans were uninsured in 2006. In 2006, an estimated 160 million to 174 million employees were covered by employer-based health insurance. 60% of employers in 2005 provided health benefits for employees. 51 million people were covered by Medicaid and state children's insurance programs in 2006. 43 million were covered by Medicare in 2006. Data were from: Kaiser/HRET Survey, U.S. Census Bureau and National Coalition on Health Care.
60. Pierce, O. "Analysis: HSAs Rolled Out for Small Firms." [UPI](#), August 22, 2006. (CS-242)
A Government Accountability Report stated that 177 million individuals were covered by private insurance in 2006.
61. Covertheuninsuredweek.org. [More than 14 Percent of Americans - 41.2 Million - Are Uninsured](#). Robert Wood Johnson Foundation, August 28, 2006. (CS-233)
A survey by the National Center for Health Statistics found that 15.4% of Americans were uninsured in 2004 and 14.2% in 2005 (41.2 million). 8.9% of children were uninsured in 2005. In 2005, 51.3 million people were uninsured for at least part of the year, over 70% of adults and 62% of children had private coverage.
62. Appleby, J. "Fiscal Experts Question Cost Effectiveness of Medicare Plans." [USA Today](#), August 8, 2006. (CS-246)
43 million people were members of Medicare in 2006, according to CMS.
63. Covertheuninsuredweek.org. [Number of Uninsured Children Declines Due to SCHIP, According to RWJF Study](#). Robert Wood Johnson Foundation, August 7, 2006 (CS-250)
A Census-based study by the Robert Wood Johnson Foundation found that about 8 million children were uninsured in 2004.

64. Rose, J. R. "Consumer-Driven Health Plans Gaining Popularity." [Medical Economics](#). 83 (15): 17, August 4, 2006. (CS-260)
177 million Americans were covered by private health coverage in 2006.
65. DenNavas-Walt, C., et al. [Income, Poverty, and Health Insurance Coverage in the United States: 2005](#). Washington, DC: U.S. Government Printing Office, August 2006. (CS-258)
In 2005, 46.6 million people were without health insurance coverage, up from 45.3 million people in 2004. The percentage of people without health insurance coverage increased from 15.6% in 2004 to 15.9% in 2005. The percentage and the number of children without health insurance increased between 2004 and 2005, from 10.8% to 11.2% and from 7.9 million to 8.3 million. The percentage of people covered by employment-based health insurance decreased between 2004 and 2005, from 59.8% to 59.5%. In 2004, 68.2% of Americans were covered by private insurance, 9.3% through direct purchase, 13.6% by Medicare, 13% by Medicaid and 3.7% by military health care. In 2005, 67.7% of Americans were covered by private insurance, 9.1% through direct purchase, 13.7% by Medicare, 13% by Medicaid and 3.8% by military health care.
66. Stern, A. "Horse-and-Buggy Health Coverage." [Wall Street Journal](#), July 17, 2006. (CS-243)
60% of employers offered health benefits in 2006, according to McKinsey & Company.
67. "More than 14 Pct Lack Health Insurance." [Reuters](#), June 22, 2006. (CS-239)
The National Center for Health Statistics found that over 41.2 million people (14.2%) and 8.9% of children were uninsured in 2005. More than 70% had private coverage (62% of children) in 2005. In 2004, 42.1 million people (14.6%) and 7 million children (9.4%) were uninsured.
68. [Early Release of Selected Estimates Based on Data from the 2006 National Health Interview Survey](#), Centers for Disease Control and Prevention, June 2006. (CS-232)
The National Health Interview Survey Family Core Component interviewed a sample of the noninstitutionalized civilian population under 65 years of age. The survey found that 41.2 million people (14.2%) and 6.5 million children (8.9%) were uninsured at the time of the interview in 2005. The 2005 NHIS found that 68.4% of persons under 65 years of age were covered by private health plans (62.4% of children).
69. [Prescription Drug Trends](#). Menlo Park, CA: Henry J. Kaiser Family Foundation, June 2006. (CS-268)
Employers provided health insurance coverage for 174 million (nearly 60%) of Americans in 2004. Medicare covered 43 million Americans in 2006.
70. [Shifting Ground: Changes in Employer-Sponsored Health Insurance](#). Princeton, NJ: Robert Wood Johnson Foundation/Covertheuninsuredweek.org, May 2006. (CS-283)
In 2006, 46 million people or nearly one in five nonelderly adults and children lacked health insurance in the United States. Data were compiled by the Robert Wood Johnson Foundation and the State Health Access Data Assistance Center, University of Minnesota, using the Medical Expenditure Panel Survey-Insurance Component and by The Urban Institute using the National Health Interview Survey.
