TEACHING EXPERIENCE

Math review (Executive MBA program, Kellogg School, Northwestern University).

Managerial Economics (MBA program, Kellogg School, Northwestern University).

Microeconomic Theory I/II (Kennedy School/Economics Department/Harvard Business School, Harvard University).

Advanced Microeconomic Analysis (MPA/ID, Kennedy School, Harvard University).

Game Theory and Strategy (KSG Executive Programs).

TEACHING MATERIALS

Notes on Microeconomic Theory. A 250 page manuscript designed to accompany my courses, API 109i and API 111, in order to make doctoral-level microeconomic theory accessible to students with interests in applied fields of microeconomics (such as public policy, development, business fields, health policy, etc.). Available for download at: http://www.ksg.harvard.edu/nolan_miller/notes.

Applied Microeconomic Theory. The notes above form the first half of a textbook that Chris Avery and I are currently writing. The goal of the text is to provide a text for students of advanced microeconomics who are not going to be economic theorists. This would include students in economics departments who are going to study empirical labor or public finance, as well as students in related graduate programs such as public policy, health policy, business, or political science. The text aims at being mathematically rigorous while at the same time emphasizing intuition and application rather than theoretical generality for its own sake. Drafts of all chapters have been written, and we are in the process of signing a book contract with Harvard University Press.
