

**API-119: Advanced Macroeconomics for the Open Economy I, Fall 2024****Course Syllabus: prospectus, schedule and readings**

<b>Staff: Professor:</b>	<b>Jeffrey Frankel</b>	<a href="mailto:Jeffrey.Frankel@harvard.edu">Jeffrey.Frankel@harvard.edu</a>
	Office hours: Mondays 3:30-6:00 pm and by appointment	
Faculty Assistant:	Erin Meade	<a href="mailto:Erin_Meade@hks.harvard.edu">Erin_Meade@hks.harvard.edu</a>
Teaching Fellow:	Prince Dhawan	
Course Assistants:	Abhishek Goel, Katherine Gutierrez Abanto, Haocheng Wang	

Email address, to send all questions for the teaching team: [mpaid.macro@gmail.com](mailto:mpaid.macro@gmail.com).

**Times:** Lectures: Mon./Wed, 1:30-2:45pm<sup>1</sup> WEX 436.  
Review Sessions: Fridays 1:30-2:45 or 3:00-4:15 pm <sup>2</sup>  
Final exam: Friday, Dec.13, 2:00-5:00 pm.

## Prospectus

**Course Description:** API-119 is the first in the two-course sequence on Macroeconomics in the MPA/ID program. It particularly emphasizes the international dimension. The general perspective is that of economies that are small and open, defined as those for whom world income, world inflation and world interest rates can be taken as given, and possibly the terms of trade as well. Questions covered are monetary, fiscal, and exchange rate policy, and the determination of the current account balance, inflation, and GDP relative to potential. Models of devaluation include one that focuses on the price of internationally traded goods relative to non-traded goods. One theme is the implications of increased integration of global financial markets. Another is countries' choice of monetary regime, particularly the degree of exchange rate flexibility. Applications are to Emerging Market and Developing Economies. They include commodity-exporting countries. (Some financial topics -- including exchange rate overshooting, speculative attacks, portfolio diversification and debt crises -- will be covered in the first half of Macro II, API-120, in February-March.)

**Nature of the approach:** The course is largely built around analytical models. Although real-world examples will appear throughout, we rely heavily on theoretical and econometric analysis, as is customary in economics classes. Having said that, the course largely leaves to the successor course, API 120, the mathematical derivation of behavioral equations from first principles of individuals' optimization of intertemporal utility.

**Who is expected to take the course:** This course, like Advanced Macroeconomics for the Open Economy II (API 120), is a required component of the core sequence in the MPA in International Development program. Some students may one day be making policy recommendations or decisions in a central bank, economics ministry, or international financial institution. Some have taken advanced macro before, but are missing the real-world intuition behind theory. Most other students are less macro-oriented, but want to understand what it is all about. Many are happy if the course leaves them better able to read the *Economist* or *Financial Times*. In addition to MPA/IDs, two or three other students are sometimes admitted by permission of instructor.

**Required tools:** Besides macroeconomics, some knowledge of basic microeconomics is presumed. Analytical tools to be used include especially calculus.

---

<sup>1</sup>/ 1<sup>st</sup> two lectures: Wed., Sept. 4; and Fri., Sept. 6.

<sup>2</sup>/ 1<sup>st</sup> review session: Wed., September 6, 2024.

## Weekly structure of the course:

A standard week will consist of two units. Each unit will consist of:

- (i) required readings, plus other recommended readings, including applications from the media;
- (ii) the live lecture from the professor (we take role; class participation counts for the grade);
- (iii) an asynchronous component, which includes one or more mini-lectures recorded by the professor plus short quizzes on all the material for that unit. Quizzes following Monday lectures are due that Friday at 8:30 am and quizzes following Wednesday lectures are due the next Monday at 8:30 am. Late quizzes will be marked down 1 point per day. Before each live lecture, students should complete the required reading for the new unit. Ideally, they will also have completed the asynchronous module for the preceding lecture.

In addition,

- (a) Friday review session is strongly recommended.
- (b) There will be 6 problem sets, due Monday, 10:00 am. Late problem sets are not accepted. (We post the answers.)

The entire teaching team will also hold office hours, TBA. Students should make heavy use of [mpaid.macro@gmail.com](mailto:mpaid.macro@gmail.com), sending any and all questions to it. The teaching team will monitor it frequently. The response to a student's question may be a directly e-mailed answer, a decision to dedicate somebody's office hours to the topic in question, or the arrangement of a special bilateral appointment.

**Grading:** 20%: 6 Problem sets (Grade based on best 5 out of 6)  
15%: Quizzes \*  
20%: Mid-term exam  
35%: Final exam  
10%: Class participation.

\* Quizzes are to be taken after each live lecture, as part of the Asynchronous Module. Do not get behind in the quizzes.

**Problem Set**                      **Due date (10:00 am). No late problem sets. (We post the answers.)**

- |    |                                    |
|----|------------------------------------|
| 1. | Monday, September 16               |
| 2. | Mon., Sept. 30                     |
| 3. | Mon., October 7                    |
|    | <i>Midterm exam: Wed., Oct. 16</i> |
| 4. | Mon., Oct. 28                      |
| 5. | Mon., November 18                  |
| 6. | Mon., Nov. 25                      |

*Final exam: Fri., Dec. 13, 2:00 p.m.-5:00 pm.*

Please note the date/time of the final exam. Do not make any conflicting travel plans.

**Regrading policy:** On receiving your exam or problem set score, look carefully through the suggested answers and comments provided. Students who wish to submit their answer sheets for re-grading should, within two weeks, write a detailed email explaining their reason.

**Academic integrity: Students must take quizzes and exams on their own, without discussion with other students.** They are responsible for knowing what is in [the Academic Code](#), including this: “Cheating on assignments or exams ... violates the standards of our community, as well as the standards of the wider world of learning and affairs...If students submit work either not their own or without clear attribution to the original source, including but not limited to the Internet, they will be subject to discipline by the HKS Administrative Board, ranging from a warning to required withdrawal or expulsion from HKS.”

You are not permitted to use ChatGPT or other generative AI in this course.

## Readings:

For each lecture, there are typically two double-starred or triple-starred readings, which students are required to read *in advance of the lecture*. You may be called upon in lecture. The second half of this syllabus lists the readings in full. Readings are either scholarly articles, textbook chapters, or short news media stories. The readings below and on the Canvas course page contain links. If links to journal articles become broken, you can find articles by searching [Harvard library’s E-Journals](#).

**Required textbooks:** The main textbook is the second half of *World Trade and Payments*, R. Caves, J. Frankel, & R. Jones (10th edition, Addison-Wesley Longman, 2007), which is abbreviated *WTP* on the reading list. Chapters are available online at the Canvas course page and also [on my Publications page](#).

The reading list also includes five excerpts from Filipe Campante, Federico Sturzenegger and Andres Velasco (abbreviated [CSV](#)), *Advanced Macroeconomics: An Easy Guide*, 2021 (LSE Press). The second half of API-120 in the spring will use this text extensively. Available [on-line](#).

**Textbooks for further background:** Students should have already studied basic or intermediate macroeconomics. The necessary pre-requisite background in macroeconomics at a basic level is represented by Greg Mankiw, *Macroeconomics*, e.g., 10th ed., 2019. At a considerably more advanced level than *WTP*, two recommended texts, in addition to CSV, are: Maurice Obstfeld and Kenneth Rogoff, *Foundations of International Economics* (MIT Press, 1996); and Carlos Végh, *Open Economy Macroeconomics in Developing Countries* (MIT Press, 2013). For money and inflation, in particular, consult “Monetary Policy,” Chapter 12, of David Romer’s *Advanced Macroeconomics*, 5<sup>th</sup> ed. (McGraw Hill, 2019).

**News stories:** The reading list also includes media reports that serve as real-world applications for what you learn, particularly in *The Economist* and *Financial Times*. Their websites typically offer a few free downloads per month. But HKS and the Harvard Library subscribe and offer students access to a wide array of searchable news articles. Students can access these publications by establishing an account via the Harvard Library catalogue [here](#).

For the [Financial Times \(Harvard Login\)](#), you can register for a special "premium" account on the *FT.com* website by clicking on the link and using your Harvard e-mail address. (After the initial registration process, you can use your ID and password to access the *FT.com* web site directly. If you need to re-register, follow the link but then click the Sign In button instead of filling out the registration form.) If you have trouble, look for additional instructions for accessing select resources through the Knet database.

# ***API-119: Advanced Macroeconomics for the Open Economy I***

**Prof. Jeffrey A. Frankel, Harvard Kennedy School**

## **Topics and schedule:**

Due dates for  
Problem Sets:

### **I. REVIEW OF BASIC MACRO CONCEPTS**

1. GDP  
(9/4) Lecture 1: GDP accounting  
Asynchronous module 1: Measuring potential output
2. More identities  
(9/6) Lecture 2: Balance of payments accounting  
Asynchronous module 2: (i) National Saving identity, (ii) Consumption & saving.

### **II. DEVALUATION AND THE TRADE BALANCE**

3. Trade elasticities  
(9/9) Lecture 3: The Marshall-Lerner condition  
Asynchronous mod. 3: Alternate assumptions of goods pricing in open economies
4. The trade balance in practice  
(9/11) Lecture 4: Empirical evidence on the elasticities  
Async.mod. 4: (i) A delayed J-curve, (ii) Overview of models of external balance.  
\_\_\_\_\_ PS 1 (Elasticities approach to TB) due 9/16

### **III. THE MUNDELL-FLEMING MODEL**

5. The open-economy Keynesian model  
(9/16) Lecture 5: The open-economy Keynesian multipliers  
Async.mod. 5: Goals (internal & external balance) & instruments
6. Meet the Mundell-Fleming model  
(9/18) Lecture 6: The Mundell-Fleming model with a fixed exchange rate  
Async.mod. 6: The Taylor Rule
7. Unconventional Monetary Policies  
(9/23) Lecture 7: Monetary policy at the Zero Lower Bound  
Async.mod. 7: The real interest rate in the model
8. International reserve flows  
(9/25) Lecture 8: Reserve flows in the Mundell-Fleming model  
Async.mod. 8: The example of China's sterilization of inflows, 2003-08  
\_\_\_\_\_ PS2 (Mundell-Fleming with fixed rate) due 9/30
9. Mundell-Fleming with a floating rate  
(9/30) Lecture 9: The model with a flexible exchange rate  
Async.mod. 9: The example of Japan's 2012-15 monetary expansion
10. Mundell Fleming with perfect capital mobility  
(10/2) Lecture 10: The model when the country loses control over its interest rate  
Async.mod. 10: The Impossible Trinity.  
\_\_\_\_\_ PS 3 (Mundell-Fleming with a floating rate) due 10/7

#### IV. INFLATION

11. AD, AS, and Inflation  
(10/7) Lecture 11: Aggregate Demand & Aggregate Supply  
Async.mod. 11: (i) Chinese overheating, 2006-08, (ii) The Phillips Curve & the labor market
12. The rational expectations attack on activist monetary policy  
(10/9) Lecture 12: Rational expectations & dynamic inconsistency  
Async.mod. 12: (i) The case against activist policy, (ii) Why might high inflation hurt growth?  
*[October 14: Columbus Day holiday]*
13. (10/16) *MIDTERM EXAM*
14. How to achieve low-inflation credibility  
(10/21) Lecture 14: Addressing dynamic inconsistency of monetary policy  
Async.mod. 14: (i) Rules vs. discretion, (ii) The decline of inflation, 1980-2020
15. Seigniorage and hyperinflation  
(10/23) Lecture 15: The theory of seigniorage  
Async.mod. 15 (i) Public borrowing, (ii) Venezuela case, (iii) Can seigniorage explain hyperinflation?  
\_\_\_\_\_ PS4 (inflation bias) due 10/28
16. Case Study: Internal & external balance in China  
(10/28) Lecture 16: Macroeconomics in China, 2003-24.  
Async.mod. 16: (i) The Swan Diagram applied to China, (ii) Macro-prudential policies.

#### V. INTEGRATION OF GOODS MARKETS

17. How well-integrated are goods markets?  
(10/30) Lecture 17: (i) Gains from trade. (ii) Does arbitrage enforce PPP?  
Async.mod. 17: Barriers to international integration
18. What explains failures of Purchasing Power Parity?  
(11/4) Do sticky prices give rise to PPP deviations?  
Async.mod. 18: Big Mac PPP
19. The Balassa-Samuelson relationship  
(11/6) Lecture 19: The role of non-traded goods  
Async.mod. 19: Case -- Was the renminbi "undervalued"?  
*[Nov. 11: Veteran's Day holiday]*

#### VI. SMALL OPEN ECONOMIES

20. The Salter-Swan SOE model  
(11/13) Lecture 20: Devaluation in small open economies  
Async.mod.20: [Adjustment in the Salter-Swan model](#)

\_\_\_\_\_ PS 5 (PPP) due 11/18

21. Currency mismatch, balance sheets & contractionary devaluations  
(11/18) Lecture 21: Contractionary effects of devaluation  
Async.mod. (21): Did EMEs conquer original sin after 2001?  
\_\_\_\_\_ PS 6 (SOE application) due 11/25
22. Introduction to crises in Emerging Market Economies (EMEs)  
(11/20) Lecture 22: Sudden stops  
Async.mod.22: Managing outflows
23. The Dutch Disease  
(11/25) Lecture 23: Macroeconomic consequences of a natural resource boom  
Async.mod.: Governments often over-spend in boom times
24. *EXTRA LECTURE, joint with Dev 401*: The Natural Resource Curse  
(11/16) 12:00-1:15 pm -- Lecture 24: Pitfalls of a large primary sector  
Async.mod.: Pro-cyclicality.

## VII. EXCHANGE RATE REGIMES

25. Balancing pros and cons  
(11/20) Lecture 25: Advantages of fixing; Advantages of floating  
Async.mod. 25: Weighing up; Optimum Currency Areas  
[11/22-11/26 Thanksgiving holiday]
26. Exchange Rate Regimes in Developing Countries  
(11/27) Lecture 26: Real shocks; intermediate regimes

**Friday, Dec. 13, 2:00 pm-5:00 pm.      FINAL EXAM**

# API-119: Advanced Macroeconomics for the Open Economy I

Prof. Jeffrey A. Frankel, Harvard Kennedy School

---

## READING ASSIGNMENTS

\* = recommended reading

\*\* = required to read, before lecture

\*\*\* = required strongly to read, before lecture. You may be called upon.

### I REVIEW OF MACROECONOMIC CONCEPTS

#### 1. (9/4) GDP accounting

Campante, Sturzenegger & Velasco (CSV), [4.1, pp 41-42](#); [7.1.1, pp. 87-88: Growth acctg.](#) \*

Paul Krugman, 1994, "[The Myth of the Asian Miracle](#)," *Foreign Affairs*, 73, 6, 62-78. \*\*

"[China's economy is more Soviet than you think](#)," *Economist*, Dec.15, 2018. \*\*

W.Chen, X.Chen, Chang-Tai Hsieh & Z.Song, 2019, "[A Forensic Examination of China's National Accounts](#)," *Brookings Papers on Ec. Activity*, spring, 77-141. [NBER WP 25754](#).

Arvind Subramanian, 2019, "Validating India's GDP Growth Estimates," July, [CID WP 357](#). Reported in "[The Indian growth fable: A former official casts doubt on India's GDP figures](#)," *The Economist*, June 15, 2019.

"[China's economy: The real deal](#)," *The Economist*, Oct. 17, 2020. \*

"[Real-Time Economic Indicators Help Better Track Activity in Africa](#)," IMF blog, May 27, 2022. \*

#### 2. (9/6) Balance of payments accounting

Caves, Frankel & Jones, [World Trade and Payments \(WTP\), 2007, Chapters 15 & 17.2](#) \*\*\*

"China Concerns: "[Tourism deficit leaves current account vulnerable to trade shock](#)," *Financial Times*, June 14, 2018.

"[Pakistan's economy: In need of re-stitching](#)," *The Economist*, June 16, 2018.

"[A milder infection: The Philippine peso is the champion of emerging-market currencies](#)," *The Economist*, July 23, 2020. \*\*

### II. DEVALUATION AND THE TRADE BALANCE

#### 3. (9/9) The Marshall-Lerner condition

Caves, Frankel & Jones, *WTP*, [Chapter 16.1 \(pp.291-97\) & Supplement \(pp. S43-S44\)](#). \*\*\*

#### 4. (9/11) The trade balance in practice.

Caves, Frankel & Jones, *WTP*, [Chapter 16.2 \(pp.297-301\)](#). \*\*\*

Jaime Marquez, 2002, "[Income and Price Effects of Asian Trade](#)," pp.1-7. Chapter in his *Estimating Trade Elasticities (Springer)*, pp. 91-97. \*\*

Dani Rodrik, 2008, "[The Real Exchange Rate and Economic Growth](#)," *Brookings Papers on Economic Activity*, No.2, fall, 365-412.

"[Africa's two most populous economies brave tough reforms](#)," *The Economist*, August 8, 2024.

### III. THE MUNDELL-FLEMING MODEL

5. (9/16) The open-economy Keynesian model

Caves, Frankel and Jones [WTP, Chapters 17.1, 17.3 & 18.1-18.2](#) \*\*\*

Olivier Blanchard and Daniel Leigh, 2014, "[Growth Forecasts Errors and Fiscal Multipliers](#)," *American Economic Review*, 103, no.3, pp. 117-120. Condensed from [IMF WP 13-1](#). \*\*

D.Egger, J.Haushofer, E.Miguel, P.Niehaus, and M.Walker, 2022, "[General equilibrium effects of cash transfers: experimental evidence from Kenya](#)," *Econometrica* 90, no. 6: 2603-2643. [NBER WP no. 2600](#).

"[US stimulus and strong remittances give boost to Mexico](#)," *Financial Times*, June 17, 2021.

6. (9/18) Mundell-Fleming model of monetary & fiscal policy with a fixed exchange rate

[Caves, Frankel & Jones, WTP, Chapters 18.3-18.4, 22.1-22.3](#) \*\*\*

CSV, [15.1.1-15.1.3, pp.219-223: IS-LM](#). \*
