SNAPSHOT

On Campus and via Zoom: The Belfer Center holds briefings with senior intelligence officials, generals, diplomats, scientists, and CEOs; co-sponsors an annual women in power conference; and supports student research on issues from the Middle East to cybersecurity.

In the World: From Silicon Valley to the Arctic Circle, the Belfer Center’s students, faculty, and fellows explore solutions to critical challenges, from encouraging technology for public good to proposing innovative policy approaches to climate change.

Belfer Center for Science and International Affairs

Facts matter. The Belfer Center is furthering policy-relevant knowledge at the frontiers of science, security, and international affairs. Challenges around emerging technologies, environmental disruption, nuclear and cyber threats, and global relations require informed public leaders equipped to address the realities of our interdependent world.

Fostering policy and leaders ready to meet the complexities of our planet’s present and future is crucial to Harvard Kennedy School’s mission to create a more peaceful, just, and secure world.
FROM THE CO-DIRECTOR

“The Belfer Center is unique among think tanks in emphasizing the lens of science and technology to understand and elevate international affairs. We do this work because we want real knowledge based in science to help policymakers and the general public make better decisions. Thanks to the pioneering work of our faculty and fellows—and our amazingly talented student body—the Kennedy School is having profound impact on the world right now.”

Eric Rosenbach

The Work of the Belfer Center for Science and International Affairs

As the hub for Harvard Kennedy School’s research, teaching, and training in science and international affairs, the Belfer Center works on:

- **Practical Solutions:** Student “Arctic innovators” propose ideas related to the bellwether rapid climate change in the Arctic.

- **Addressing Challenges:** The Project on Europe and the Transatlantic Relationship is researching and recommending steps to revitalize transatlantic relations in areas ranging from trade to technology.

- **Global Impact:** The Belfer Center is helping to reduce nuclear dangers and future conflicts through research on North Korea, Iran, Russia, and China.

- **International Relations:** Belfer Center efforts are strengthening NATO alliances and cooperation.
