**Note:** Section assignments for DEV-250 will be given to you after the first plenary meeting of the semester on **Thursday, September 5, 2019.**

1. **Course Description**

The DEV-250 “Second Year Policy Analysis,” the capstone product of the MPA/ID program, is a course designed to help you further develop your professional skills as a development practitioner and think about how evidence can be used for policy.

The main output is the SYPA report itself, which calls for the application of the theoretical and empirical techniques acquired in other courses to an actual development problem. The report is written for a specific client (a government, agency, NGO, etc.) and involves the diagnosis of a problem, the formulation of a policy proposal, that assessment of political support and the development of a feasible implementation plan. This requires that you identify an issue, develop the conceptual and empirical basis for recommended action, and then present your analysis and recommendations in a written document.
The process of analysis itself, as well as the effective communication of the analysis to others, is an important part of the skill-building process (and your grade). Thus, in addition to the final product, you will be required to:

- Submit intermediate products throughout the process designed to further the analysis and gain feedback from others
- Effectively communicate your results through oral presentations and a self-standing policy brief

**Clients:** While the report must be written for a real client, you are not required to have an actual relationship with them. This is for two reasons: (1) not all clients on truly interesting development questions will be available and interested; and (2) clients’ interests may not be aligned with the primary purpose of the SYPA, which is to define a problem and use techniques from the overall MPA/ID Program. Having a real relationship with your client is fine provided that this does not lead to a product that is inconsistent with the SYPA goals.

**Resources:** Several resources are available to help you develop your SYPA report:

- The *DEV-250Y seminar* will allow you to interact with section leaders and other MPA/ID students with similar interests. You will be assigned to one of three sections based on your likely SYPA topic, which you will provide at the end of the first class meeting. Subsequent sessions are designed to coach you through the steps of preparing the SYPA and to develop your professional skills as a policy adviser. Section leaders advise individual students about both substance and process. Support and insights from fellow MPA/ID classmates is especially important and this is formally incorporated into the process.

- Each student will also have a faculty adviser, drawn from the HKS faculty, who has specialized expertise in at least some of the issues associated with his or her SYPA. The most helpful advisers are those with enough interest in you and/or your project to actively assist you in developing a valuable SYPA. We strongly encourage you to discuss your topic with faculty members who might be interested in serving as an adviser as soon as possible. If you are still considering several possibilities, consult potential advisers about ways to define a topic. By Thursday, September 26th 2019, every student must have found an adviser. Those who have not done so will be assigned one as part of a school-wide process, but it is far better to find a good fit on your own than to be assigned.

Students should note that it is their responsibility to meet regularly with their section leaders.
leader and adviser. In the fall semester, the key output is the SYPA outline. Adviser confirmation to the section leaders are required on these outlines, as they constitute a contract between the student, the adviser and the section leader.

The first full SYPA draft is due at the beginning of the spring semester. The rest of the spring semester is devoted to revisions, making oral presentations, submitting a final SYPA and preparing a policy brief.

2. Objectives of the SYPA Experience

The SYPA experience provides an environment for building and expanding a number of critical, professional competencies, including:

- Identifying and conceptualizing an important development problem;
- Interpreting how a problem is related to potential processes of change;
- Applying technical approaches to analyze these challenges, using tools from economics, political analysis and diagnostic approaches to implementation;
- Using effective empirical techniques—quantitative and/or qualitative;
- Assessing the political supportability and authorizing environment for policy alternatives;
- Preparing practical recommendations for action by key decision-makers;
- Developing effective communication through both written work and oral presentations;
- Providing constructive feedback to colleagues on all of the above.

The combination of seminars, relationships with the adviser and the section leader, and interactions with other students, form the crux of the SYPA experience and present you with an opportunity to build these competencies.

For most, the SYPA will be an unfamiliar experience. Note that the SYPA is:

- **Not a slightly longer term paper.** Students who try to do it during a few intense weeks in February always find that they have misjudged the quantity of work. They produce an inferior product and are at a high risk of failing.
- **Not a research report.** Students who have modeled their SYPA on research articles have also been disappointed in their final grade. While strong research is a necessary input, the SYPA is primarily concerned with using the research findings for practical policy recommendations.
- **Not just a methodological exercise.** Students who carry out elaborate technical analyses are sometimes surprised to find that they need to deal with the practical implications of messy policy situations involving stakeholders with diverse and conflicting interests.

What, then, is the SYPA? The SYPA is an analysis in which you frame a development problem conceptually, use analytic tools to generate a better
understanding of the problem and of the options available for dealing with it, and provide recommendations and implementation advice tailored to the needs of decision-makers. Good SYPAs provide conceptual, analytic, and empirical support for the recommended actions, as well as clear analysis on how the problem (and your recommendations) relate to drivers of change and interact with political processes. Good SYPAs provide an assessment of implementation capacity and give a realistic framework for the implementation of the recommendations.

Students can work either as individuals or as pairs. If you work as a pair you will both receive the same grade (unless there are large differences in the participation part of the grade).

3. Enrollment

All second-year students in the MPA/ID Program must enroll in DEV-250. The course is worth 6 credits. Successful completion of the SYPA is a prerequisite for graduation from the MPA/ID Program. This course is restricted to MPA/ID students.

4. Course Design

There will be three sections of DEV-250. We will try to group students with similar interests as well as to balance the size of the sections.

The course is structured to take students through a sequence of intermediate steps for policy analysis, including:

- defining a policy question
- literature review and conceptualization
- alternative empirical strategies
- political analysis
- analysis of implementation
- making effective presentations
- targeting policy briefs to alternative stakeholder narratives

The meetings of DEV-250 will take several forms:

- **Plenary class meetings**. These classes will bring together the entire MPA/ID second year class to introduce and discuss a topic. **All full class meetings will be held in Littauer 140.**

- **Section meetings**. Section meetings will be used to take you through the various phases of the work, from initial problem definition to the policy brief, using a mixture of small group work, presentations, discussions and feedback. Giving feedback to others is an important professional skill, and this will be integrated into the course in the section meetings.
- **Individual meetings with section leaders and advisers.** You should work with your section leader and your adviser to clarify your topic, develop strategies for collecting and analyzing data, and examine the implications of your analyses and recommendations. You bear responsibility for arranging meetings.

The course is designed to take students through the various components of preparing and delivering a professional policy paper. However, there may also be somewhat more fluidity than a standard course in order to accommodate periods of intensive presentation, group work, and faculty travel.

Within each section, students will often be organized into smaller groups—typically 3-5 people—working on closely related themes. This will allow interactions within these groups, including informal presentations and feedback. Learning how to give critical, constructive feedback (in a safe environment) is a valuable professional skill.

### 5. Human subjects

If a SYPA involves research or use of data involving human subjects, this needs to be assessed and approved by Harvard’s Committee on Human Subjects (CUHS) before the research is undertaken. Screening for whether your work involves human subjects will be done early in the fall semester and managed by section leaders. Expert interviews do not count as human subjects but still require approval by section leaders of an oral consent form. Michael Walton is the point person for human subjects for the course.

### 6. Deadlines

The SYPA is organized around six deadlines. These deadlines are fixed, so do allow enough time to complete all assignments:

<table>
<thead>
<tr>
<th>DATE</th>
<th>DELIVERABLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thursday, September 5, 2019</td>
<td>Initial topic selection</td>
</tr>
<tr>
<td>Thursday, September 26, 2019</td>
<td>Submission of adviser preference</td>
</tr>
<tr>
<td>Tuesday, November 12, 2019</td>
<td>SYPA outline</td>
</tr>
<tr>
<td>Sunday, February 2, 2020</td>
<td>First draft of SYPA</td>
</tr>
<tr>
<td>Monday, March 16, 2020</td>
<td>Final draft of SYPA</td>
</tr>
<tr>
<td>Sunday, April 12, 2020</td>
<td>Policy brief</td>
</tr>
</tbody>
</table>

- **Topic selection:** you will provide an initial description of your topic, in one or two paragraphs (a form will be sent). Your assignment to a DEV-250 section will be based on this. While few students have a fully specified topic at this point, the overwhelming majority of past students have written SYPAs on some aspect of the initially identified topic. Reallocations between sections may occur as topics evolve, subject to keeping roughly equal section sizes.
- **Adviser selection**: this is the date when all advisers are assigned. This is a school-wide process that goes beyond MPA/IDs—we strongly encourage you to meet with advisers early to get a good match.

- **SYPA outline**: this is essentially a contract between you, your adviser and your section leader, covering the substance of your SYPA. It should include the conceptualization of the policy or institutional reform problem, your initial literature review, your methodology and your planned analysis of your SYPA. It may be necessary to redraft the outline before all parties concur in its design, but it is vital that this agreement be completed before the end of the semester so that you can work on an agreed plan during the winter break. Advisers must sign off on the outline, either literally or by email.

- **First SYPA draft**: this is the basis for (a) making a presentation to the members of your section and (b) getting feedback from your adviser and section leader. The better developed your first draft, the higher the quality of feedback you will get from both those sources. *We strongly recommend that you prepare a first draft that is a complete product.*

- **Final SYPA**: due March 16th, 2020, immediately after the start of the Spring Break (you are free to turn it in earlier). This date is intended to keep your Spring Break free for other activities while offering you the first weekend of the break to apply last minute finishing touches to your work if needed.

- **Policy Brief**: this is a self-standing product, in which you will write a sharp, four page brief that is both positioned strategically to interact with the positions of the various stakeholders, and is highly accessible and engaging.

The way to get the most from this process is to take these deadlines seriously, in substance and timing, so you do not have to play “catch up” just to survive. **Getting behind is the most common problem for students working on SYPA**s. It is easier to work on immediate course demands than to work on the intermediate products in the fall semester. It is critical to define a feasible topic as soon as possible so you can make realistic plans.

In addition to these deadlines that relate to the substance of your SYPA, **all students will need to prepare a submission to section leaders for Human Subjects Review, by October 17th, 2019**. Section leaders will determine whether you have human subject issues. If your research does not involve human subjects, the process ends there. If it does involve human subjects, then you will need to make a formal submission to Harvard’s Committee on the Use of Human Subjects in Research (CUHS). Clearance by CUHS is required before undertaking any research involving human subjects. You will also be required to have completed the human subjects training and to have received a CITI (or equivalent) certification. If you anticipate human subjects issues, it is recommended you start discussing these earlier than this deadline.
Major assignments should be turned in electronically by 4PM on the due date (unless otherwise indicated in the syllabus or your section leader). Late submissions will affect your grade. Note that the final SYPA must also be submitted in paper form as well as electronically.

7. Grading.

DEV-250 is worth 6 credits and will be graded on the usual HKS grade distribution. **Writing an acceptable SYPA (B- or better) is a pre-requisite for graduation.** Grades will be based on the quality of your final SYPA, as jointly assessed by your adviser and section leader, and on your submissions and presentations in the preparation of the SYPA, participation in classes and section meetings, and the policy brief. The grading breakdown is as follows:

- **Final SYPA:** 50%
- **SYPA Outline:** 15%
- **Draft SYPA:** 15%
- **Policy brief:** 10%
- **Class Participation/Assignments:** 10%

The grades for the final SYPA and policy brief will be based exclusively on the written products. Grades for the SYPA outline and the draft SYPA will be based both on these written products and class presentations.

The class participation element will be based on the quality of your contribution to class discussions, and completion of the other intermediate assignments.

**Late SYPAs** (those turned in after the March 16th deadline) will be automatically penalized two grades (e.g., from B+ to B-).

Final papers that your adviser and section leader consider unacceptable (below B-) will be returned for further revision and such revised SYPAs cannot receive a final grade higher than B.

8. Joint degree students

The requirements, timing and grading for joint degree students will be the same as for other students, with two qualifications:

- Students undertaking a joint HKS/HBS degree will have an HBS adviser as well as an HKS adviser.
- Students at other schools may not be able to join class sessions in the Spring Semester, depending on their location. All deadlines for written assignments remain the same. If you cannot come and make a presentation of your draft SYPA in person, efforts will be made to have you make your presentation by video conference. We encourage you to make special efforts to stay in touch with section leaders and advisers throughout this semester.
**DETAILED CLASS SCHEDULE**
(While deadlines are fixed, specific meeting schedules may vary by section, to accommodate travel, group composition etc.)

**Fall Semester**

<table>
<thead>
<tr>
<th>Date</th>
<th>Class Type</th>
<th>Description</th>
<th>Deliverable Due</th>
</tr>
</thead>
<tbody>
<tr>
<td>9/5/2019</td>
<td>Plenary (Littauer 140)</td>
<td><em>Class Introduction, the Elements of the SYPA process and schedule - Rema Hanna, Arvind Subramanian, and Michael Walton</em>: We will discuss the course, deliverables, and what makes a good SYPA. The session will also include an introduction to Harvard library resources by HKS librarian Valerie Weis, including books, journal articles, databases, data sources, government publications, think tanks etc.</td>
<td></td>
</tr>
<tr>
<td>9/12/2019</td>
<td>Section Meeting (section rooms)</td>
<td><em>Identifying Useful Analysis and Initial Problem Selection</em>: We will deconstruct a previous SYPA as a group in relation to the actual grading criteria. Each student will have an opportunity to present their initial ideas.</td>
<td>Come to class having read the assigned SYPA and filled out your grading sheet.</td>
</tr>
<tr>
<td></td>
<td></td>
<td><em>Defining a scope of work</em>: Each student will bring a 3-4 slide presentation written for their client that outlines the TOR. Students will be expected to both present on their topic and provide feedback.</td>
<td>Bring your presentation and get ready to discuss!</td>
</tr>
<tr>
<td>9/19/2019</td>
<td>Section Meeting (section rooms)</td>
<td>Continuation of workouts on initial scope of work</td>
<td></td>
